PROFILE

A fifth-semester Computer Science student at Bina Nusantara University Interested in technology, especially web development, Big data, data engineering, and data analytics. Skilled in managing people, time, and cross-divisional teams, with experience leading one organization and serving as a team leader in several projects. Highly curious and eager to learn new things, with a strong desire to grow and the ability to adapt to new environments and challenges.

EDUCATION

Bina Nusantara University **August 2024 – Present**

Computer Science, School of Computer Science GPA: 3.14 of 4.00

- Related Courses: Algorithm and Programming, Program Design Methods, Discrete Mathematics, Basic Statistics, Linear Algebra, Data Structure, Human Computer Interaction, Calculus, Scientific Computing, Database Technology, Big Data Processing, Data Engineer, Data Analytics, etc.

PROJECTS

Cafe Sales Data Analysis & Visualization (Data Analyst & Visualization Course Project) | GitHub | Tableau

Analyzed 10,000 cafe transactions to identify patterns, customer behavior, and business insights.

- Performed data quality assessment and cleaning using Python and Pandas as part of a team project
- Analyzed customer behavior and transaction patterns through multivariate EDA
- Applied Chi-Square Test and Cramér's V to evaluate categorical relationships
- Designed 2 of 3 Tableau dashboard pages to analyze revenue and relationships between variables

Walmart Sales Forecasting Model (Big Data Processing Course Project) | GitHub | PowerBI

Built a distributed sales forecasting project using PySpark and Machine Learning to predict store-level Walmart sales.

- Processed 421,570 training records using PySpark for preprocessing and feature engineering.
- Trained 2 regression models, Linear Regression and Random Forest, using PySpark MLlib, with a time-based train-test split for sales forecasting
- Compared models using RMSE and R^2 to select the better-performing model

GigStart Website (Software Engineer Course Project) | GitHub | Live Demo

AI-powered web platform integrating learning, competency assessment, portfolio building, and career preparation into one ecosystem.

- Created user flows, wireframes, and high-fidelity interactive prototypes using Figma
- Translated UI/UX designs into responsive React/Vite frontend with reusable .jsx/.css components and interactive navigation
- Integrated the frontend with the backend system for functional user interactions.

DKI Jakarta Air Quality Data Pipeline & Analytics (Data Engineer Course Project) | Documentation | PowerBI

Automated ETL pipeline to process and clean multi-station air quality data in Jakarta, enabling structured data storage and interactive dashboard visualization.

- Cleaned historical ISPU data and removed missing values across 5 pollutant parameters.
- Built an automated ETL workflow using Pentaho Job to reduce manual preparation.
- Enhanced a Power BI dashboard using DAX Field Parameters for better interactivity

ORGANIZATIONS

HIMTI BINUS University **March 2025 – Present**

Division of Responsi – Activist

- Created structured Calculus study notes shared with 350+ students to support academic preparation
- Produced an introductory Figma tutorial video shared with 350+ members to support adaptation to design tasks
- Contributed to content development and knowledge sharing within HIMTI's internal academic support system.

HISHOT 2026 – Vice Chairman Kemanggisan

- Led 2 divisions, Design and Web Development, overseeing 16 team members, including 1 coordinator and 1 vice coordinator for Design and 1 coordinator for Web Development.
- Supervised output across 10 Design members and reviewed deliverables from 5 Web Development members for quality assurance.

TECHNO, HISHOT, & HIMTI Anniversary 2025 – Staff of Event Division

- Served as Liaison Officer for HISHOT Workshops 1 and 2, each with 30 participants, and developed MC scripts for TECHNO 2025 and HIMTI Anniversary
- Coordinated event rundowns, technical rehearsals, and audience engagement concepts across multiple HIMTI events throughout 2025.

BSLC BINUS University **February 2025 – January 2026**

IT Development Division – Activist, Event Division Coordinator

- Developed the BSLC Main Website Product Page featuring E-Learning, Responsi, and Discord sections using Next.js and Tailwind CSS
- Led a team of 4 members in organizing a 3-day seminar series covering Creative, Business, and Technology, with 300+ participants per day
- Led a team of 3 members in organizing campus benchmarking visits with external organizations, preparing proposals, ToRs, and MoUsCareer Preparation 2025

UREEKA Software Development Community BINUS University **March 2026 – Present**

Training and Course – Core Team

- Delivered training on the software development lifecycle and public speaking for competition preparation to 20 students.
- Recognized as Outstanding Team Member (June 2026) for contributions to the Training and Course Division.

CERTIFICATION & ACHIEVEMENT

Innovation Award, BRICS Industrial Innovation Contest 2026 (Qualifying Round, Green Industry Track)

Contributed to frontend development and data analytics for Carbonis, a blockchain-based platform for converting organic waste into verified carbon credits.

VOLUNTEER EXPERIENCE

Teach For Indonesia (TFI) **February 2025 – March 2025**

Mathematics Tutor

- Taught Mathematics to twelve ninth-grade students in a structured small-group setting
- Designed practice questions and learning materials to reinforce key concepts
- Improved students understanding, raising average scores from the 60s to the 80s through targeted practice.

TECHNICAL SKILLS

- **Design & Project Management**: Figma, Microsoft Office, Trello, Notion
- **Programming:** HTML, CSS, JavaScript, Python, SQL, Java, C
- **Data & Data Analytics**: Pentaho PDI, Power BI, Tableau, PySpark MLlib.
